

CHAPTER IV

CLOSING

A. RESUME

Takabonerate is a small village in the district in South Sulawesi that is not yet developed in terms of tourism potentials. The main activities of the populations in this area are working as an entrepreneur or seller, fisherman driver, farmer and majority of women there are not working or being a housewife and some of them worked as civil servant . The thing, is most of the folks were got married in such a young age. That is why their economical level is average to below average.

Nowadays, the industry of *marine Tourism* well developed in this area, therefore it can rise up the income of this region and the populations. Since the employees of those home industries are taken from their own local community. Takabonerate village is worth to be proposed as the upcoming tourism destination place in Selayar Regency . Somehow this region also has another great potential to support the establishment of Takabonareta village as the new tourism place in Selayar regency.

Based on the research that the researches has done, talking about the way to manage the tourism potentials within this island , whether or not this region can be the new tourism destination place in Selayar regency? Whether or not the concept of tourism village based-special interest tourism will match the development of this region? Lastly, will this development affect to the advancement of tourism sectors in region ? The conclusions are, Takabonearet village has so many tourism potentials such as: *marine tourism*, agricultural, river, the famous drawbridge, and etc. In the end, this region is

qualified enough to be proposed as the new tourist destination place in Selayar regency. Somehow the folks are so friendly and they're used to meet the guests as well

The establishment of the new tourism destination place and the new concept in this region will affect to the advancement of Selayar regency, understanding that the special interest tourism has not been applied in this town yet. Due to that reason, the application of the special interest tourism concept will be able to trigger another region in Selayar regency to find their region's specialty and uniqueness in order to make their village to be more developed as well as to rise up the prosperity of the folks inside the area. Since the development program will be impacted to every individuals in this village.

B. RECOMMENDATION

Here are some suggestions from the researcher for the betterment of this Karaskepoh village:

1. The government and the Folks of Takabonerate island should work hand in hand to develop the region. The folks here should be more active in discovering the new assets of the region and actively consult to the government on how to develop and manage their potentials. As for the government, they need to facilitate the development plans of this village well. Not to mention that the government needs to give socialization and also training for all local community in this area.
2. The Folks in this region need to start making an activist group of this village that works in creating a development-plan for the region and how to manage it as soon as possible then discuss it with the tourism department in NATIONAL PARK (
3. Start to make a promotion media of the local product through the internet (website), so that the product will be acknowledged by other people easily and the scale of this sales activity is also wider. Therefore, the buyers will not solely from
