

ABSTRACT

Torre Fort is a heritage fortress of the Portuguese people on the island of Tidore which was built on January 6, 1578. The entire torre fortress has been damaged but still leaves approximately 30% of the entire torre fortress building. The beauty of natural scenery and historical stories that are owned by the tourist attraction of this Torre fort makes this Portuguese heritage fort interesting to visit. The purpose of this research is to increase the interest in tourist visits to the tourist destinations of Fort Torre.
