Editor and Reviewer comments:

Reviewer #1:

1. This article is very up-to-date and interesting, but in my opinion the novelty is not visible in the introduction, because the references you have quoted are still minimal and have not been compared with your research, so the novelty is not visible.
2. The research method must be described in detail so that each process is carried out.
3. Literature review needs to be strengthened with current references to discuss the problem you are researching.
4. The focus of this paper is more based on Indonesia alone. What if taken from another country?

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Damiasih

Ambarrukmo College of Tourism, Yogyakarta, Indonesia

Thank you for your team's efforts to improve your team article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, your team has to improve on a few more points. Hopefully, your team is willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I hope this article can be used soon even though only English in other parts is so low that it is difficult to read. But the topic is vital.
2. The literature review includes some tantalizing references, but the links are not made more to specific studies even after sifting through language issues.
3. When the study model comes into play, serious questions exist about the system being used.
4. This article can be published if the Author can work and often asks editors or colleagues fluent in English to clean up inappropriate language and arguments.
5. Additional notes it is not clear what title refers to the article.

Articles that have been revised and please send them back via this email.
